

We are delighted to invite you to the visitors' day of 3WATER; a great opportunity to see what the project partners have managed in the project area of the LIFE+ project 3WATER near Hasselt. The event will showcase local fauna and flora, including our flagship species the bittern and tree frog, as well as economic activities like fish farming and forestry. Guides which were trained during the project, in cooperation with experts, will show you around the paths and help you discover the highlights of the area.

Visitors can choose one of 6 offered guided tours. The tours are offered in the morning as well as in the afternoon. More details about the guided tours are in the event program.

Program:
