

Closing Conference LIFE+ 3WATER: Results and Lessons Learned

In the name of all our partners, we have the pleasure to invite you to our

Closing Conference LIFE+ 3WATER which will happen the **10 december 2013 !**

Universitaire Stichting, Egmontstraat 11, 1000 Brussel

10:00 – 17:30

The closing conference of the LIFE+ 3WATER project is hosted by the European Landowners' Organization and the 3WATER partners.

The focus of the conference will be the examination of five years of hard work in the Vijvergebied Midden-Limburg in the Limburg province of Belgium. Through intensive cooperation between private landowners, nature organizations, local communities, as well as national and European authorities, the partners have created new habitats for the flagship species of the project; the bittern and tree frog.

The aim of the conference will be to explore all aspects of the projects; what can we learn from the cooperation of private landowners in Natura 2000 areas and LIFE+ projects, how do the results and expectations of the partners compare, what are the realizations of the project and what is the future of this participatory model?

These questions and more will be discussed and debated by our expert panelists throughout the day, and together we will examine the results of this remarkable project.
